What have done on my case?
You showed upto court Feb 14th not prepared and asking me about my case, did not speak up about Perrota lying about what I said to her.
I requested you to subpeona the initial three emails to fogarty, subpeona the video the three emails refer to she lied about, and subpeona all of the public posts of the facebook account. The facebook account needed a court order for facebook to remove Gabriel Yolda.
*** You have not sent in subpeonas nor filed for the court order for anything as far as I know because all you tell me is your busy with other peoples trials.

If you knew you were already so busy with everyone elses trials you should not have accepted the case. I need an attorney who is going to do what I ask them to do. Talk to me about the strategy they would like to do, ask me what I think and what I want to do not whatever plan you want.
That shit is reckless.

This is not your life, your not the one with an ex that waisted your time serving coffee not studying just hanging out the rest of the day for years smokkng weed just chilling instead of getting an actual education while you worked your ass off and ended up broke because of her and then has a judge she serves coffee to signing court orders for her and her psycho boyfriend.

All you have shown me is your have no problem waiting till the last minute to do anything and you push all your cases to trial stocking up court hours getting paid taking the long route.

You want to shake hands with the DA, then join the DA's team and stop being a spy for them sacrificing peoples livelyhoods and family time. You court appointed attorneys prioritize your relationships with these court employees instead of defending your clients like you should and act like you have done nothing wrong throwing people to the wolves for better outcomes on your paid clients cases. Your not going to get a 5 star rating being a court room rat for the DA office and judges. You have to have a spine to be an attorney people respect.

Andrea Fogarty does the same thing your doing in court, instead of reprimanding these people shes suppossed to be overseeing actions of shes backing them and covering up not only human rights violations that border war crimes but also dangerous acts like putting a loaded gun at a table and leading a prisoner to it. I CAN FMRI ALL DAY ON WHAT I HAVE SAID TO YOU AND IN ALL OF THOSE EMAILS I SENT THE HPD AND CONTACTING THE DOJ, FBI, ETC and still be the one person out of all of them to come out on top.

You should have more faith in your clients and consider their lives. Government officials are known to be mechiavallian and psychopaths by nature an not care about anyone else. Thats why we need a guy like Trump in office because he does not need the money and can not be swayed by it.

You check your email everyday, a simple reply stating you are actually working on my case and submitting the requested motions, subpeonas, etc would help keep me and anyother client you have from getting pissed off and showing the world your infact not doing a damn thing and just waiting for the next court date.

You had that shit coming, what did expect from a guy that has the balls to call out a lying internal affairs officer for months then ask for honorable cops to speak up. It is a shame none of them did and retaliated instead of being good at their jobs. Had attorneys not given me the cold shoulder conflict of interest bs, etc I would have used them instead and Fogarty would not have had to cower like the coward internal affairs officer she is not owning up.

It is disrespectful.

Cops and these court evaluators need to be video taped and you know it better then anyone being an attorney.

So just send me my files, I'll do the work myself, put in for my appeal of these bullshit half ass comptency reports and I'll submit what I need too to get my case dismissed and voided. Get that video, sue, and get my record straightened out myself.

This whole case is a prime example of how corrupt and fucked up the judicial system and government is.

My book is going to drop jaws. Your best bet is to just hand over my shit and not be a dick anymore waisting my time.

Seriously.
